Note for configurations with 11" toms: 11" toms are only available with a few options of Remo heads			<b>CS-6PC:</b> 7x8/8x11/10x14/11x18/17x22/SD	\$3482

4-pc configurations above include an arm for the mounted snare, one for the mounted tom (two for 5-pc kits) then either an arm or brackets-n-legs for the floor tom. All configurations with 18" & larger basses can have either the Standard 4½x14 or 4½x13 snare (\*except CS-BOP.) These are completely nested kits where toms fit inside each other, the snare sits on top of the floor which all fit into the bass\*. When you carry the snare separately, tom and bass depths can vary at no additional charge—pricing is based on diameters. For example, a 15x15 tom fits in a 16x20 bass and a 13x14 tom fits in a 14x18 bass; a 9x10 fits in a 10x13 fits in a 14x16 fits in a 15x20 bass. If you go this way, snare depth can vary—a minimum of 4.5" is required if you want to mount it to the bass. Start by selecting your Base Model, then indicate any depth adjustments:
